(54) LOCKING DEVICE FOR CASE FOR STORING STORAGE MEDIUM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a device for locking a storing case for storage medium wherein the movement for locking and releasing of a lock is simply done to quickly lock and to simply remove a device for locking.

SOLUTION: The titled device is constituted of a case 10 wherein a top lid part 12 and a bottom lid part 13 are separated on its side end as a center and open/close movement is performed on another side end, a locking cap 20 being a locking means which checks the open/close movement of the case and keeps it under locked state by locking the case, and a locking-releasing member 30 for releasing the locked state by the locking cap and locking is performed by inserting and locking a hook part 23 formed in inserting holes 22 and 22' of the locking cap to projected ribs 121 and 121' of locking holes 132 and 132' formed in the case, and the locking is released by inserting a projection 31 for releasing the locking of the locking release member into an inserting hole.
